● Edition: December 2025

Welcome Note

The sea never sleeps, and neither does regulation. December 2025 reminded the world that maritime business is now carbon, compliance, and credibility. At GreenHul, we choose leadership, not reaction.

Bangladesh Maritime Snapshot

Bangladesh Moves Closer to Greener Recycling Standards

- Chattogram Port throughput continues rising.
- Blue economy governance is gaining policy traction.
- Hong Kong Convention entered into force in June 2025, reshaping ship recycling standards.

GreenHul positions itself as a strategic bridge between global expectations and Bangladesh's evolving maritime ecosystem.

What GreenHul Can Be

- **HKC & ESG** Compliance Partner for South Asia
- Maritime Decarbonization & **ESG** Strategy Advisor
- Port & Logistics Sustainability Consultant
- Knowledge, Training & Policy Support Hub

Opportunities Ahead

- **HKC-Ready Yard** Certification Support
- Port Green Transition Packages
- Maritime Finance & Insurance ESG Scoring
- International maritime collaboration & events

Focus Areas

December 2025

- Translating **HKC** requirements into practical action.
- Tracking global carbon-pricing discussions.
- Supporting Bangladesh's blue economy strategy.

Global Maritime Trends

- a) Decarbonization: IMO's carbon reduction targets and future fuel standards shape all decisions.
- b) Regulation as a Filter: **ESG, HKC**, and market-based measures now influence access to cargo and finance.
- c) Ocean Responsibility: Sustainability is now central to global maritime branding.

Closing Note

GreenHul is ready to support ship recyclers, port authorities, shipowners, operators, banks, and insurers. The ocean reflects what we put into it—this is the time to choose meaningful leadership.
