Closing the Year: A Voyage Worth Remembering

December arrives like the calm sea after a storm—reflective, powerful, and honest. While 2025 has been a year of tides, negotiations, and audits, **GreenHul Solutions Limited** has stood strong as Bangladesh pushes toward safer and greener ship recycling practices.

We engaged stakeholders, trained the workforce, drafted frameworks, and helped yards raise the bar. Every vessel carries a history; we ensure it is dismantled with respect for people and the planet.

2025 Impact Report: Milestones & Achievements

We didn't just consult—we built transformation.

Strategic Milestones

- **EU Compliance:** Provided advisory support to ship recycling yards moving toward EU-compliant practices.
- **Safety Protocol:** Introduced training modules for worker safety and environmental protocols.
- **Policy Advocacy:** Advocated for national guideline alignment with IMO & Hong Kong Convention (HKC) requirements.

Global Maritime Trends: 2025 Snapshot

- **Green Demand:** Increased demand for green-compliant ship dismantling.
- **Regulatory Shift:** The EU focus is shifting towards sustainable yard certification.
- **Digitalization:** Standardization of digital vessel tracking and IHM documentation.
- **Sustainability:** The Maritime circular

Technical Spotlight: IHM & HAZMAT Support

1. On-board inspection.
2. Lab sampling & classification.
3. Full IHM Report structure & removal strategy framework.

The Result: Safer operations, smooth clearance, and global acceptance.

2026 Training Programs

Scheduling is now open for Q1 2026

- HAZMAT Handling & Awareness.
- Fire & Emergency Response for Yards.
- Compliance & Documentation Masterclass.
- Green Recycling Standard Certification Preparation.

Knowledge Corner: Quick Notes for Yard Owners

- **Documentation:** Treat documentation as a legal shield, not a formality.
- **Safety First:** Ensure firefighting equipment and PPE are available daily.
- **Records:** Maintenance of Material Safety Data and recording disposal of waste oil, paint, and asbestos is mandatory.
- **Culture:** Continuous training is superior to occasional briefings.

Closing Note

This year, we sailed through storms and sunlight alike. We thank our global and national partners, maritime officers, recycling yard owners, and every worker who risks their life to dismantle giants of the ocean.

— Message from the Board
